REMARKS

U.S. Pat. App. No. 2004/0078328 (Talbert et al.) does not teach “provid[ing] access to [an] e-commerce network subsequent to verification of . . . a minimum credit rating of a user,” as recited in independent claim 1. Nor does Talbert et al. teach “qualifying a user to access an e-commerce network [by verifying] a minimum credit rating for a user,” as recited in independent claim 7. Instead, Talbert et al. teaches the consideration of credit at different times and for different purposes. Claims 1 and 7 of this application evaluate a user’s minimum credit rating in order to enable access of a customer through a gateway. Talbert et al. differs from the claims in that it employs credit on the other side of any such gateway to determine on a transaction-by-transaction basis how much credit can be extended to a customer (*see, e.g.,* ¶ 0035 (“the credit authorization subsystem 32 may establish a maximum credit amount based upon [a] customer credit score”)).
